<https://www.linkedin.com/in/daniel-pierce-iv>

## SUMMARY

A passionate web developer with strengths in back-end web technologies, but also comfortable with front-end or full-stack development.

## EMPLOYMENT HISTORY

### Confidence Analytics

Oct 2016 - Apr 2017

[Full Stack Web Developer](#)

Redmond, WA

Worked with a team to develop a Customer Management System for office staff customer engagement. Developed with the Laravel framework using Docker, Git version control, testing and Agile processes throughout development. Specific technologies include HTML, CSS, Javascript, PHP, MySQL, Laravel, Docker and Git.

## PROJECTS

### Daemon <https://github.com/Daniel-Pierce-IV/Daemon>

Multiplayer monster-battling game using websockets and javascript (currently in active development).

**Developed with: Javascript, Phaser, Node, Express, Socket.io**

### Forecast <https://github.com/Daniel-Pierce-IV/Forecast>

A seven-day weather forecast app that automatically updates based on the user's current location.

**Developed with: HTML/CSS, Javascript, jQuery**

## PROFESSIONAL SKILLS

HTML 5, CSS 3, Javascript, PHP, MySQL, Git, Laravel, Docker, Vue, Node, Express, Socket.io
